

# Systems Analysis and Design using the Unified Modelling Language

## Contents

Section	Topic
1	Course Introduction
2	Overview of the UML
3	The Development Lifecycle
4	Getting Started – What’s the Problem?
5	Process Modelling with Activity Diagrams
6	Capturing Requirements with Use Cases
7	Advanced Use Cases
8	Beginning the Class Diagram
9	Scenarios and Sequence Diagrams
10	Building the Class Diagram
11	Association and Aggregation
12	Generalisation and Specialisation
13	State Diagrams
14	Fitting It All Together
<b>Appendices</b>	
14	Suggested Use Case Template
15	Analysis Roadmap
16	Case Study 1 – Panic Button
17	Case Study 2 – Sid’s Supermarket
18	Paper 1 – Structuring Use Cases With Goals
19	Paper 2 – The Misuse of Use Cases
20	Glossary of Terms and Bibliography
